

ISHAQ\_STOPMOTION PRESENTS

# HELPER BOT 3175'S FIRST MISSION

AN EPIC STORY BY ISHAQ ATTIA

## CHAPTER ONE

# THE CREATION OF HELPERBOT 3175

**CLANK! CLANK! CLANK! BLEEP BLEEP BLOOP!**

HelperBot 3175 was cruising around the city searching for crime. He had Mr Engineer on his mind.

Mr Engineer designed and created HelperBot 3175 the year before, because crime was increasing and the government's wealth was decreasing. It took him 3 days to build the helper bot, 1 day to program him and another 3 days to train him. Mr Engineer's last words to HelperBot 3175 was 'Go and fight crime in the way I showed you. Try and lock up the worst villain in the most secure prison'.

HelperBot 3175 was medium in size but was as strong as an elephant. He had a square head which had a tiny camera that was undetectable. It was used to take photos secretly. The camera was extremely quiet, its volume was 0.0000000000001% — only things that were atom sized could hear the flash of the camera. He used these photos to make wanted posters that he stuck around the city. HelperBot 3175 was made out of silver aluminium. He wasn't made out of gold. Would you like to know why? Mr Engineer did not want him to be stolen by criminals. Criminals only steal things that are rare and have a very high value.

The city people would stop him on his walks and say 'Look! We can see our reflection on your silver body' or 'Can we take a photo with you? You're the shiniest object we have ever seen'. HelperBot 3175 polished himself twice a day with cream of tartar to keep him gleaming. He had a small broom which he used to dust himself off. He couldn't let too many dust particles enter through his open areas and into his computer otherwise he would stop functioning. When he was out in high temperatures, he used solar panels which blocked out the sun but most importantly it gave him energy. Solar energy was vital to keep him going.

'Solar energy makes me strong! Solar energy makes me strong'. He chanted throughout the city. It was so catchy the city people would follow him on his walks and chant along with him. **#SOLARENERGYMAKESMESTRONG\***

## CHAPTER 2

### MR STEAK

During his morning walk, HelperBot 3175 unexpectedly detected a bank on an island through his sensors! 'Solar energy makes me str.....this is unusual' he thought. The island was located near the edge of the Pacific Ocean. HelperBot 3175 looked inside the bank using his sensors. He saw a villain known as Mr Steak. Mr Steak was known as Mr Steak because steak is expensive and his biggest heist was worth over \$1 million! 'This villain ought to be locked in a jail cell!' He exclaimed. 'If I find out he is the worst villain, then I will make sure he will be locked up for as long as possible'.

For 10 years police forces had captured and locked up Mr Steak in prisons around the world but he always managed to escape.

HelperBot 3175 emailed his fellow robot friends a description of Mr Steak along with a photo- It said:

**MR STEAK HAS BEADY EYES AND IS MEDIUM IN SIZE. HE IS AS FAST AS AN SSC TUATARA (THE FASTEST CAR IN THE WORLD ACCORDING TO A GOOGLE SEARCH) AND HAS A FANTASTIC BRAIN.**

In the letter, he included an important warning, written in bold, to alert his friends.

**WARNING- Do not go out and fight him, I will handle him. I will send orders for when I need backup!**

MRS Teak

Criminal  
Friends

HelperBot 3175 needed to come up with a brilliant plan.

### **CHAPTER 3**

## **THE UNKNOWN ISLAND**

HelperBot 3175 used his sensors on Mr Steak all day to try and solve the mystery of how he got onto the island. The sensors were useless on Mr Steak now! He remembered he could use his mind reading device which was installed in his antennas. He worked out that Mr Steak had turned the city's bank into an aeroplane! That's how they travelled to the Island!

It only took HelperBot 3175 a few seconds to transform into a rocket launcher.

# **KABOOM!**

Before he landed onto the island, he turned himself back into a robot and built himself a shield to avoid any damage. He wasn't hurt so he didn't yell out.

## CHAPTER FOUR

### THE TRAP

HelperBot 3175 planned a trap for the criminals. Dirt and debris was flying everywhere, creating a mountain on one side and a hole in the middle of the bank — this hole was going to capture the criminals.

Mr Steak and the criminals walked into the bank.

The floor was not real, it was an illusion- and so was the door! The door was drawn on perfectly, it looked very real. The lines were straight, neat and not wiggly at all.

There was a sign on the fake door that said —

‘FREE **GOLD** IF YOU OPEN THIS DOOR’

Out of excitement one of the criminals jumped up and yelled ‘YAHOO let’s go!’ Mr Steak called out ‘WAIT! this is a trap!’ he saw that there were some crumbs from the bank floor from the digging that had been left behind. He also saw that the fake paper floor was bending. HelperBot 3175 was in a rush so he didn’t do a good job making the floor like he did with the door. Mr Steak punched through the fake floor —

**KAPOW!**

Helper Bot 3175 was waiting down below ready to capture the criminals. But when he saw Mr Steak, he froze. His plan didn't work. The criminals were looking down at him from up above too. His tungsten heart was pounding very hard. 'THUMP! THUMP! THUMP!' His computer brain was thinking of a solution.

But

Mr Steak was also very smart, he struck a match, lit up a dynamite and threw it on HelperBot 3175. HelperBot 3175 quickly made a shield.

**BOOOOOOOOM!!!!!!!!!!!!!!!**

**Crrrrraaaaackkkkkkk**

'Uh ohhh' said HelperBot 3175 'My shield broke!!'  
It broke from the explosion.

## CHAPTER FIVE

### THE SECOND TRAP

Fortunately, HelperBot 3175 survived.

Mr Steak jumped down

# THUD!

‘Who are you?’ Asked Mr Steak. HelperBot 3175 refused to answer and instead turned himself into a gold van. He made sure the back of the van faced Mr Steak and his criminal friends so that they could see what was inside.

It said **‘FOR YOU’**

The back door of the van opened up to a boot full of astatine (a rare element). This time, Mr Steak fell for the trap and said to his fellow criminals **‘DO YOU KNOW WHAT THIS IS!? THIS IS ASTATINE!! IT IS THE RAREST ELEMENT IN THE WORLD!’** Mr Steak couldn’t resist astatine, no one had ever seen this element on planet Earth. He wanted it all to himself and always dreamt of swimming in a pool of it.

Mr Steak led the criminals into the van with his glittering eyes and his arms stretched out. They stood in awe. All their mouths were open as big as a beach ball. ‘This will teach you a lesson’ HelperBot 3175 whispered to the air. The door went **SLAM!** He turned himself into an

aeroplane and flew to the nearest police station. He turned the back of the van into a jail cell. On one side of the wall he had a painted sign that said

‘You're trapped LOL!’

He vaporised the astatine into the atmosphere, it was as if it had never existed. He then turned himself back into a robot. HelperBot 3175 dropped Mr Steak and the criminal friends into a jail cell. ‘We will get you next time!’ Mr Steak said in anger. HelperBot 3175 was very smart. He reinforced the walls and the bars with tungsten (the strongest element in the world) and then turned himself into a flying spray can and wrote on the jail cell walls

YOU'RE NEVER GONNA GET OUT  
OF HERE :P

But Mr Steak realised that the spray can was actually HelperBot 3175. Before HelperBot 3175 had a chance to leave the jail cell, Mr Steak grabbed the spray can and started spraying all over the message and the jail cell walls in anger. HelperBot 3175 shrunk himself into a size of an atom. Mr Steak was confused ‘Wait a second?! What?? Where did he go?’

## CHAPTER SIX

### A VERY GOOD PLAN

‘AHA!’ thought HelperBot 3175 as he looked at the huge gaps between the jail cell bars. He realised he could escape easily. Atoms are very, very, very, very, very small, so they can fit through very, very, very very, very small gaps.

HelperBot 3175 travelled out of town. He didn’t want anyone to spy on him. He found a bush. He used the leaves to **camouflage** himself.

He grew tiny pieces of atom sized aluminium from his own hand. He then grew those pieces until they were just the right size for his **cloning machine**. He spent an hour building this cloning machine. He electrified the machine using the electricity which was within himself. His cloning machine started to power on.

**‘BBBBZZZZZZZZ’**

He needed to test this machine to see if it could work. ‘I’ll try this!’ He threw in a block of wood. There were now 2 blocks of wood!

HelperBot 3175 went through the cloning machine and saw himself come out through the other end. He told his clones to go through the machine again and again and again. Once there were about 1 million clones, HelperBot

3175 gathered his clones, and instructed them 'If you are able to, fight Mr Steak! Go and fight other criminals whom you have detected. You can use my cloning machine to help. But make sure no criminals walk through!'

Two of the clones grabbed the machine and shrunk it until it looked like a toy portal. One of the clones put the tiny clone machine into its pocket.

## CHAPTER SEVEN

### 1 MILLION AND 1 HELPERBOTS

Half of the clones went on to fight crime around the world.

The other half (that's 500 000) surrounded Mr Steak's jail cell. (Don't try and imagine this, it will explode your mind) Their job was to guard the cell to make sure he never escaped again. Some were clinging onto the walls, others were on the roof, some were flying above the jail cell and the rest were marching around the cell chanting —

'YOU WILL NEVER ESCAPE AGAIN! YOU WILL NEVER ESCAPE AGAIN!'

They never slept but they had their daily breakfast of screws. They chatted with one another during breakfast, but other than that they worked day and night. Mr Steak shouted out to the half a million clones that surrounded his cell —

'I WILL FIGURE SOMETHING OUT!'

## CHAPTER EIGHT

### TUNGSTEN BARS

'Who has the cloning machine?' HelperBot asked. A clone put his hand up. HelperBot said 'Give it to me clone' the clone obeyed.

HelperBot 3175 turned the cloning machine into a growth machine. He programmed it so that Tungsten was the only element that it could grow.

It took an hour to grow 137kg of Tungsten. He melted those pieces together using a furnace he created with the extra iron he had. He planned to use this to reinforce all the jail cell walls.

But how was he going to do this without being caught by Mr Steak? HelperBot 3175 came up with an idea! He made himself invisible using a spray potion. He reduced the volume to -3000% (so that Mr Steak wouldn't hear what he was up to) and got to work.

## **CHAPTER NINE**

### **FAILED ESCAPE**

That night, Mr Steak was trying to break through the cell bars with a broom that had the sharp end of an iron pick axe attached to it. He realised he couldn't make a dent in the cell bars. The top of iron pick axe broke in half. 'This must be Tungsten!!! I'll figure something out, and I'll break out of this prison once and for all!

To be continued...

HELPER BOT 3175 WAS CRUISING AROUND  
THE CITY WHEN HE DETECTED A VILLAIN  
KNOWN AS MR STEAK.

CAN HELPER BOT 3175 DEFEAT MR STEAK?  
WILL MR STEAK KEEP BREAKING OUT OF  
PRISON?

THIS ACTION PACKED SHORT STORY WILL  
KEEP YOUR HEART RACING RIGHT TILL THE  
VERY END.
